

DR. JABALY'S WEIGHT LOSS PROGRAM

QUICK FACTS:

- Dr. Georges Jabaly has taken weight loss to new heights. The development of the program guarantees a loss of 1+ pound(s) per week, and has a very affordable price tag. Dr. Jabaly is actually expanding his Holland-Sylvania location, and is dedicating the new wing for weight loss.

- Did you know that diets, such as South Beach, 5-Factor Diet, Weight Watchers, Jenny Craig and more, can cost up to \$385 the very first week?* Also, these programs only address weight loss. Dr. Jabaly has created a very powerful program, which is monitored every step of the way; consequently, patients can overcome any hurdles and plateaus that can come their way.

- Dr. Jabaly has uncovered one of the most prominent factors behind why so many people are overweight: METABOLIC SYNDROME.

Dr. Jabaly defines Metabolic Syndrome as consisting of the following symptoms:

- Abdominal obesity
- Blood fat disorders
- Elevated blood pressure
- Insulin resistance or glucose intolerance
 - Prothrombotic state
 - Proinflammatory state
 - Physical inactivity
 - Aging
 - Hormonal imbalance
 - Genetic disposition

Dr. Jabaly's weight loss program is so advanced; rather than limiting a person's diet to only low-fat, or low-carbohydrate, he creates a healthy diet according to the patient's blood type! Also, this program is not strict at all, with no relapse. It is also body-shaping, where the patient tightens and tones up, rather than experiencing any sagging skin. Here's what one patient had to say after gaining control of her chronic pain by entering the program:

"[...] I was so miserable before I came to your office, and not only did you minister to my physical well-being, but I will never forget the very first thing you did was pray with me, which ministered to my spiritual being (and of course that is far more important than the other)."-Renee Cosby
